Git, GitHub, Vite, Vercel, Render, Postman, Trello, Jira

PROJECT EXPERIENCE

Personal Portfolio Website, 2026

GitHub: <https://github.com/AlisaPagan/portfolio> | **Live:** <https://alisapagan.dev/>

Personal portfolio website for presenting front-end projects, UX case studies, experience, and contact information.

Role: Front-End Developer, UI Designer.

- Built a responsive portfolio using Next.js, React, TypeScript, and CSS Modules.
- Created reusable components for project cards, sliders, buttons, tags, navigation, and case study sections.
- Implemented dynamic project pages, 404 page, theme toggle, favicon, SEO metadata, OG images, and analytics.
- Improved accessibility with semantic structure, ARIA labels, keyboard-friendly controls, and responsive navigation.
- Optimized images, loading behavior, and layout stability to improve PageSpeed performance across screens.

Tech stack: TypeScript, React, Next.js, CSS Modules, Swiper, React Hot Toast, Vercel

“Relax Map”, 2026

GitHub Front-end: <https://github.com/AlisaPagan/chillscape-frontend> | **GitHub Back-end:** <https://github.com/AlisaPagan/chillscape-backend> | **Live page:** <https://chillscape-frontend.vercel.app/>

Team-built full-stack platform for discovering, reviewing, creating, and editing relaxation locations with user profiles.

Role: Scrum Master, Full-Stack Developer.

- Built populated user profile page; polished locations page, homepage reviews, popular locations, reusable location cards, and create/edit location flows.
- Created frontend API utilities and proxy setup to connect the Next.js frontend with the backend API.
- Implemented dynamic fetching and display logic for locations, reviews, and user-related content.
- Improved responsive styling, layout consistency, and UI polish across core pages.
- Developed backend user endpoints for current user data and user profile updates.
- Organized team calls, sprint communication, workflow, and final project cleanup.

Tech stack: TypeScript, React, Next.js, Node.js, Express, MongoDB, CSS Modules, REST API, Axios, TanStack Query

“GoRaiding”, 2025 — In Progress

GitHub: <https://github.com/AlisaPagan/go-raiding>

Full-stack raid organization platform for World of Warcraft players to browse, create, and manage raid groups.

Role: Product Designer, Front-End Developer, Full-Stack Developer in Progress.

- Planned the product structure and UX flows for raid discovery, raid details, character selection, dashboard states, create-raid flow, join requests, and user profile management.
- Designed a mobile-first interface focused on clear raid information, role needs, item level requirements, approval states, and player decision-making.
- Created frontend structure and reusable UI components using Next.js, React, TypeScript, and CSS Modules.
- Planned API-connected frontend behavior for raid filters, raid cards, user dashboard states, character selection, and join-request status.
- Next: complete the frontend MVP, polish the main user flows, and prepare the app for backend integration, authentication, Blizzard OAuth, and character import.

Tech stack: TypeScript, React, Next.js, CSS Modules, Zustand, TanStack Query, Axios, Node.js, Express, MongoDB, Blizzard API

WORK EXPERIENCE

Graphic Designer / Level Designer, Enjoy Games, 2021-present

- Created marketing materials (ad banners, videos, store assets) for paid ad platforms.
- Assisted with level assembly and playable ads for mobile games.
- Collaborated with developers using JavaScript-based ad formats.

Web & Graphic Designer, DigitalianLab, 2019-2025

- Built client websites using WordPress and Elementor.
- Designed logos and print materials for small businesses.
- Assisted with content and digital marketing materials.
